

Access Manager Lite

Access Manager Lite

Access Manager Lite allows you to view device and key activity within your store(s) with no annual license fee.

What customers get:

- Number of keys checked in / out
- Device naming and management
- Timestamped device activity (disarm, unlock, etc)
- 2 Users – Management and Associate

Access Manager Pro: is our new branding of our fully featured Access Manager. Available to customers for one flat price, per store, per year.

Access Manager Lite – Why

Value to InVue and our Partners:

- Intermediate step to drive conversion from smart lock only installs to Access Manager Pro
- Increases value of InVue Access Manager compatible hardware products
- Free offering incentives customers to install a KAS, internet access, and agree to our MSA and SOW.
- We can begin to collect our customer's data to show them the value of our ecosystem and entice them with the Access Manager Pro features.
- When customers are ready to convert to Access Manager Pro the stores area already equipped with the correct hardware (KAS & Internet).

Access Manager Pro vs Lite

Access Manager Pro

- Ties individual user identification to an activity within the store(s)
- Greater visibility and access control to the sales floor
- Users can be quickly added and modified through the “Roles” feature
- Ability to “zone” the store into departments or individual areas of control
- Insight into high traffic areas

Access Manager Lite

- Slimmed down version
- Delivers insight into the usage of InVue products
- Users can view device and key activity
- No software license fee

Feature	Lite	Pro
